SUSTAINABILITY

WHERE COMMITMENT MEETS CONSERVATION

Verified Ecofund

Verified EcoFund will accompany us each year to identify and prioritize the most promising projects, while measuring our results in concrete terms. Instead of simply offsetting our emissions, we actively work to reduce our fossil fuel, waste, and water consumption by investing in more efficient technologies and tracking our reductions.

Using renewable energy

100% of our electricity is hydroelectric.

Sourcing responsibly & locally

Our menus are designed to provide seasonal and local food. We purchase sustainable and/or local ingredients, such as cage-free eggs and responsible seafood (highlight relevant responsible/local ingredients).

Certified GreenStep Sustainable Tourism Pathway

We are actively continuing our efforts to reduce our carbon footprint and integrate responsible and sustainable business practices throughout our operations.

Serve 360

Launched by Marriott, this program aims to drive meaningful change in four key areas: sustainability, diversity and inclusion, community engagement, and empowering individuals through career opportunities. To learn more: Marriott.com/Serve360

Enfant Soleil

We are an Enfant Soleil-certified company. This certification reflects our commitment to supporting the Enfant Soleil Foundation in its vital mission to collaborate with healthcare professionals across Quebec to improve pediatric care. Throughout the year, we participate in various initiatives aimed at raising funds for the Foundation.

ESG contribution

To provide tangible support for our environmental, social, and governance initiatives, we put in place an ESG contribution applied to the cost of your stay. This fee enables us to fund sustainable initiatives that have a positive and measurable impact.

Insectflux partnership

We are partnering with Insectflux to repurpose our food waste through an innovative insect-based bioconversion solution, thereby contributing to waste reduction and the circular economy.
