# Florida Statewide Medicaid Managed Care Long-Term Care Program

**Beth Kidder**  
Florida Medicaid Director

**August 17, 2018**

## Overview

<table>
<thead>
<tr>
<th>Program Enrollment</th>
<th>Cost Containment</th>
</tr>
</thead>
</table>
| • Recipients are mandatory for enrollment if they are:  
  • 65 years of age or older, or age 18 or older and eligible for Medicaid by reason of a disability.  
  • Determined by preadmission screening to require:  
    • Nursing facility care; or  
    • Hospital level of care, for individuals with cystic fibrosis.  
  • 100,000 recipients currently enrolled in LTC health plans  
  • New populations added in 2 phases: 2013 and 2018 | • Blended capitation rates and other rate incentives for transition to the community  
• Community High Risk Pool to avoid plan disincentives for transition of high cost enrollees to the community  
• Expanded benefits provided by plans at no additional cost to the state  
• Participant Directed Option |

Requirements for Rebalancing

• Incentive payment adjustment for the successful transitions of LTC enrollees from nursing facility to a home and community-based setting
  – Current contract: Incentive payment adjustments continue until no more than 35% of a plan’s enrollees are receiving services in nursing facilities.
  – New contracts (start 2019): Incentive payment adjustments will continue until no more than 25% of a plan’s enrollees are receiving services in a nursing facility.

LTC Rate Methodology
Incentivizes Rebalancing

• Florida law requires that base rates be adjusted to provide an incentive for plans to transition enrollees from nursing facilities (NF) to the community (HCBS).

Required Transition Incentive Until 35% NF

• An enrollee who starts the year in a nursing facility is treated as NF for rate blending for the entire year, even if they are transitioned to the community. A similar situation applies for enrollees starting the year in the community.
• Plans “win” financially if they beat the target transition percentage, “lose” if they do not meet the target.
Avoid Disincentives to Transition: Community High Risk Pool

- Created to assist LTC plans with high cost community enrollees
  - To re-allocate funds among the LTC plans to account for HCBS enrollees whose average monthly HCBS claims exceed $7,500 per month during each quarterly disbursement period.
  - Capitation dollars are withheld from the rate on a per member per month basis.
  - Those dollars are re-distributed to plans based on the risk of the plan enrollment as determined by their claims exceeding the dollar threshold.
  - Revenue Neutral to State – The dollars distributed do not exceed the dollars withheld.
Expanded Benefits: Additional Services Provided at No Cost to the State

- Current contracts: LTC plans offer specific Expanded Benefits.
  - These are in addition to the required Medicaid HCBS benefit and are at no cost to the state.

- NEW contracts: All plans that provide LTC services will ALSO provide medical/behavioral health services to their enrollees.
  - All plans will offer a rich Expanded Benefits package including more than 55 benefits.

Participant Directed Option

- A service delivery model in which participants hire, train, supervise, and dismiss their direct service worker(s). Available to:
  - All LTC enrollees who live in their own home or family home, AND
  - Who have at least one of the following services on their care plan
    - Adult Companion Care
    - Attendant Care
    - Homemaker
    - Intermittent and Skilled Nursing
    - Personal Care
