

Chapter Roundtable: Sustainability

An expert panel discussing progress and priorities for sustainable systems engineering within INCOSE's EMEA Sector · 1 hour

This panel will be a unique opportunity to hear from EMEA Sector's three chapter working groups (France, Germany and UK) addressing sustainability, how they see the problems, and where they are active. Additionally, we will hear from selected panellists from other EMEA countries. The panel is expected to demonstrate both the diversity across EMEA and common priorities.

Who should join

Systems engineers, architects, and sustainability practitioners who want to understand the priorities for sustainable systems engineering across the INCOSE EMEA Sector. What concerns are driving our work, what challenges we face, where we see opportunities to advance the state of practice.

What you'll do

- Hear a range of national perspectives and reflect on commonality and differences.
- Provide thoughtful challenge to the panel and/or share your point of view.
- And as a result, inform the global INCOSE Sustainability Working Group.

Agenda (1 hour)

- 5 min — Welcome, goals & ground rules
- 25 min — Short position presentations from each WG/country
- 25 min — Question & answer session
- 5 min — Wrap-up & next steps

What you'll leave with

A good understanding of what INCOSE is doing with regard to Sustainable System Engineering in the EMEA Sector, and a view of what topics could be the next "hot potatoes".

Format: panel session with facilitated question & answer session. **Duration:** 1 hour. **Bring:** your insights.

Facilitator: Alan Harding · INCOSE / IfSE Systems Sustainability Working Group.
