AASHTO Sub-Committee on Design
TRB Committee on Access Management
Seattle, Washington

Dear Attendees and Friends of the Committees:

Thank you for coming to the Pacific Northwest to attend this year’s conferences. Washington state welcomes you and your family to Seattle, one of the most exciting and dynamic cities in the world.

As you might have noticed on your way here, Washington has some of the most diverse landscapes upon which we must plan, design, and build transportation infrastructure. Volcanos, mountains, river gorges, inland sounds with saltwater habitat, vast stretches of Pacific beaches, and the thriving metros of Seattle and Spokane (to name just a few) all create tremendous challenges and exciting opportunities.

Investment and stewardship is important to those who live, work, and conduct business here. Fortunately, our state has a long history of industry and innovative companies that have made Washington their home. Boeing, Microsoft, Costco, Nordstrom, Starbucks, Weyerhaeuser, and Amazon have all grown in Washington. These companies have, and continue to provide, the economic matrix Washingtonians enjoy and are proud to share in their continued success.

We take great pride in the transportation investments and achievements of the past and present. Transit and light rail investment, floating and suspension bridges, the nation’s largest ferry system, passenger and freight rail, and bicycle/pedestrian pathways are all part of our multi-modal transportation system providing choices for those who live, cycle, ride, drive, walk, and ship in Washington state. We now look forward to new ways of planning and designing in this new era of transportation: balancing all modes and reconnecting neighborhoods under a new economic model that provides service and savings to those who travel around the state.

While you engage and participate in this year’s conference, I encourage you to make time to explore all that Seattle has to offer. We hope the atmosphere of the city will provide the backdrop of a conference you won’t forget. And perhaps that memory will encourage you and your family to return, to see and experience more of Washington state.

Thank you,
Lynn Peterson
Secretary of Transportation
KEEPING AMERICA MOVING

WSP | Parsons Brinckerhoff offers a full range of services for the transportation systems that connect communities and keep America moving—now and in the future.

Choose WSP | Parsons Brinckerhoff to keep your region moving.
