

Our California Commitment

Better Jobs, Better Value, Better Access

With the opportunity to modernize our network, we are committing to invest more than $19 billion into high-speed network infrastructure across rural, urban, and suburban California over the next five years, from 2026–2030.

We're also committing to bring fiber—the best internet technology—to an additional 4 million+ California households and businesses by the end of 2030.

This transition and our investment to expand fiber to more Californians will allow us to hire hundreds of technicians with good paying jobs and reflects our long-term commitment to the state, our communities, and our customers.

Invested in California for 148 years
