COURSE DESCRIPTION

.....

This course will define the cyclical process of action research in a classroom setting, and how it drives continuous improvement. You will learn the steps of the process that include identifying a problem, reviewing current literature, formulating a solution, testing the solution, analyzing data, making a conclusion, and sharing the results. By the end of the course, you will have completed an action research cycle and have a standardized approach to implementing future action research projects into your classroom. In this course you will design an action plan for your classroom, develop an additional resource to support your plan, and analyze research to support implementation in the classroom. The course ends with you designing an implementation plan designed to ensure you are successfully incorporating the lesson concepts, ideas, and resources into a future lesson.

COURSE OBJECTIVES

Participants will be able to:

- i. Design an appropriate action research question aligned with a classroom problem
- ii. Conduct literature reviews and design a solution that can be implemented for testing into the classroom
- iii. Design a data analysis plan and present those findings for future learning
- iv. Complete an action plan for use in the classroom, along with a supporting resource
- v. Analyze and defend an article on how these ideas apply to the classroom
- vi. Plan, reflect, and report on implementation progress using a Classroom Implementation Plan.
