

GO GREEN INITIATIVES

Our resorts are committed to a high-performance sustainability model that reduces environmental impact through advanced energy systems, responsible resource management, and continuous operational improvement. We focus on scalable, systems-level solutions that strengthen long-term environmental stewardship across the entire campus.

Resort Initiatives

Energy-efficient HVAC

VRF-based high-efficiency systems deployed campus-wide for optimized thermal performance and reduced energy load

Energy Cogeneration

On-site cogeneration delivering simultaneous heat and power to lower emissions and grid reliance.

LED Lighting Campuswide

Interior/exterior LED fixtures with motion and occupancy sensors to minimize idle consumption.

Biodegradable Supplies

Biodegradable paper and plastic products used property-wide; single-use items limited to guest request.

Waste Management Partnership

Certified waste management collaboration supporting a comprehensive recycling program.

City Compost Partnership

Standardized composting protocols with City of Carlsbad labeling and sorting requirements.

Cardboard Baler

Active baler system compressing cardboard to reduce volume and streamline recycling.

Recycled Water Irrigation

Irrigation fully supported by recycled water and rain-sensor controls for conservation.

EV Charging Stations

Standard and ADA-accessible EV charging infrastructure available across the property.

Guest Room Initiatives

LED Lighting With Smart Controls

Guest rooms equipped with LED fixtures and occupancy-based controls to reduce idle energy draw.

In-Room Waste & Recycling

Dual waste and recycling bins provided in every room to support proper sorting and reduce contamination.

Bulk Amenity Program

Refillable shampoo, conditioner, and body wash dispensers significantly reduce single-use plastics.

Single-Use Upon Request

Single-use amenities available only upon request to minimize unnecessary waste generation.

Recyclable Room Keys

Eco-friendly keycards designed for reuse and recycling.

F&B Initiatives

Biodegradable Serviceware

All paper and plastic service items are biodegradable; single-use products limited to guest request only.

Energy-Efficient Culinary Equipment

High-efficiency ovens, refrigeration, and appliances reduce energy consumption across culinary operations.

Local & Seasonal Menus

Menus emphasize local, seasonal, and sustainably sourced produce to reduce transportation emissions and support regional agriculture.
