Call for Papers

First IME-conference

A conference on insurance mathematics and economics will be held

August 25–27, 1997
Faculty of Economics and Econometrics
University of Amsterdam

Papers of international interest, concerned with either the theory of insurance mathematics and economics, or the inventive application of it, including empirical or experimental results, can be accepted for presentation. Papers combining several aspects are especially welcome, as well as a limited number of papers of a pedagogical nature.

The subject matter of the conference includes the theory, models and computational methods of life insurance (including pension systems, social insurance and health insurance), of non-life insurance, reinsurance and financial risk arrangements. Also included are solvency considerations, and, under the topic of insurance economics, innovative insurance applications of results from other fields such as probability theory and statistics, finance, computer science and numerical analysis, economics, operations research and management science, and risk management.

Abstracts of papers should be sent, or, preferably, E-mailed, before March 1st, 1997, to:

Dr. R. Kaas

A registration form can be found enclosed in this issue of Insurance: Mathematics and Economics, or it can be obtained from the above address.

The organization committee consists of R. Kaas, M.J. Goovaerts, H. Wolthuis. The scientific committee of the meeting consists of the members of the editorial board of Insurance: Mathematics and Economics. This committee will determine which submitted papers will be accepted for presentation. A special volume of Insurance: Mathematics and Economics will be devoted to a selected number of refereed papers submitted for presentations on the conference.
