PENN MEDICINE DEPARTMENT OF RADIOLOGY PRESENTS

BREAST IMAGING AT THE BEACH

JANUARY 11-14, 2027

Four Seasons Resort, **Punta Mita**

2027

OVERVIEW

This meeting offers a comprehensive review of all facets of breast radiology. The program features outstanding education in foundational principles and the latest advances in research, along with valuable networking opportunities and practical refreshers for all participants, whether new attendings or experienced clinicians, in private practice or academia, specialists or generalists. Topics include management of patients in high-risk histology, contrast-enhanced mammography (CEM), the axilla, BI-RADS 3, supplemental screening, advanced MRI protocols, and artificial intelligence. Case conferences will emphasize strategies to improve patient outcomes and further refine breast imaging practice.

COURSE OBJECTIVES

Upon completion of this activity, participants should be able to:

- ☐ Review the application and appropriateness of multi-modality supplemental breast cancer screening
- ☐ Improve image-guided breast procedure skills
- ☐ Summarize the updates in BI-RADS and the management of high-risk histology
- ☐ Describe how to optimize CEM and breast MRI imaging sequences and exam interpretation
- ☐ Discuss applications of artificial intelligence in image interpretation, quality, and risk assessment

TARGET AUDIENCE

This post-graduate CME course will provide dedicated breast radiologists and general radiologists with a review of practical applications, current trends, and emerging techniques in breast imaging.
