Patient-Reported Outcomes Abstract Winner
“A New Comprehensive Measure of High Value Aspects of Primary Care”
by American Board of Family Medicine

Person-Centered Primary Care Measure
Rebecca S. Etr, PhD, Stephen J. Zyzanski, PhD, Martha M. Gonzalez, BA, Sarah R. Reeves, FNP, MRA, Jonathan P. O’Neal, BS, Robert L. Phillips, MD, Kurt C. Stange, MD, PhD

Objective: Develop/evaluate concise measure of primary care, grounded in stakeholder experience.

Methods: 1. Survey of 1,000 patients, clinicians, health care payers to identify quality/value in PC.
2. National conference. 2% days (Washington DC), 70 patient, clinician and policy leaders.
3. Fielding of 11-item Person-Centered Primary Care Measure among 2500 patients.

Results: 1. Measure has strong concurrent validation and reliability using 3 statistical analyses.
2. All 11 items assess a single factor – Primary Care – with almost no redundancy.

Conclusion: 1. Measure reliably, comprehensively, and parsimoniously assesses aspects of care that may be responsible for high-value primary care.
2. Analysis shows statistical support of stakeholders perspective – primary care is both broad and internally coherent with the whole equal to more than the sum of its parts.

THE PRIMARY CARE MEASURE
(Responses Categories: Definitely, Mostly, Somewhat, Not At All)

The practice makes it easy for me to get care.
This practice is able to provide most of my care.
In caring for me, my doctor considers all the factors that affect my health.
My practice coordinates the care I get from multiple places.
My doctor or practice knows me as a person.
My doctor and I have been through a lot together.
My doctor or practice stands by me.
The care I get takes into account knowledge of my family.
The care I get in this practice is informed by knowledge of my community.
Over time, this practice helps me to meet my goals.
Over time, my practice helps me to stay healthy.

Organizational Efficiencies and Design Abstract Winner
“RCA2 and Human Factors Science to Increase Strength in Action Items”
by Joshua Clark, Carilion Clinic
