Optimizing Warfighter Medical Readiness: Meet the Program Management Office (PMO)

Ms. Madeleine Friedman, Program Manager

LTC James Pak, Deputy PM, MBA, MOS, MHIT, PMP, SEC+, ITIL, BPR

Ms. Evelyne Headen-Haywood

Mr. Terence Zelek

Agenda

- 1** Introductions
- 2** Organization Overview
- 3** Alignment of Defense Health Agency Director's Line of Effort
- 4** Occupational and Environmental Health Surveillance Readiness (OEHSR) Programs
- 5** Knowledge Check

Speaker Introduction

Madeleine Friedman

Program Manager

Management System

PEO MS/DHA

Learning Objectives

- 1** Describe the OEHSR PMO's Mission & Vision
- 2** Describe how the PMO's programs align with the DHA Director's Lines of Effort
- 3** Differentiate how each of the systems support Warfighter Readiness and Force Protection

Occupational and Environmental Health Surveillance Readiness (OEHSR) PMO Overview

Mission: To enhance the medical readiness of the Department of War by integrating and delivering accessible, reliable information on individual health, occupational & environmental hazards, and veterinary services, empowering informed healthcare decisions and maximizing force protection.

Vision: Lifelong Warfighter & DoW readiness: powered by data-driven health intelligence, ALWAYS.

Prevent, Protect, Provide – Always Ready

Alignment to DHA Director's Lines of Effort

LOE 1 – Deliver Warfighter Medical Readiness

- Protect the Force: Leaders at every echelon will be equipped with timely, robust, and relevant information to make decisions to prevent illness and injury and to protect people and their communities.

LOE 3 – Deliver Joint Warfighting Capabilities

- Ready to Respond: Leaders will recognize DHA Public Health as the definitive expert, an integral member of the planning, training, and exercise processes. The Military Health System, Services, Joint Staff, and Combatant Commanders will be supported to carry out their missions efficiently and in productive partnership with DHA Public Health.

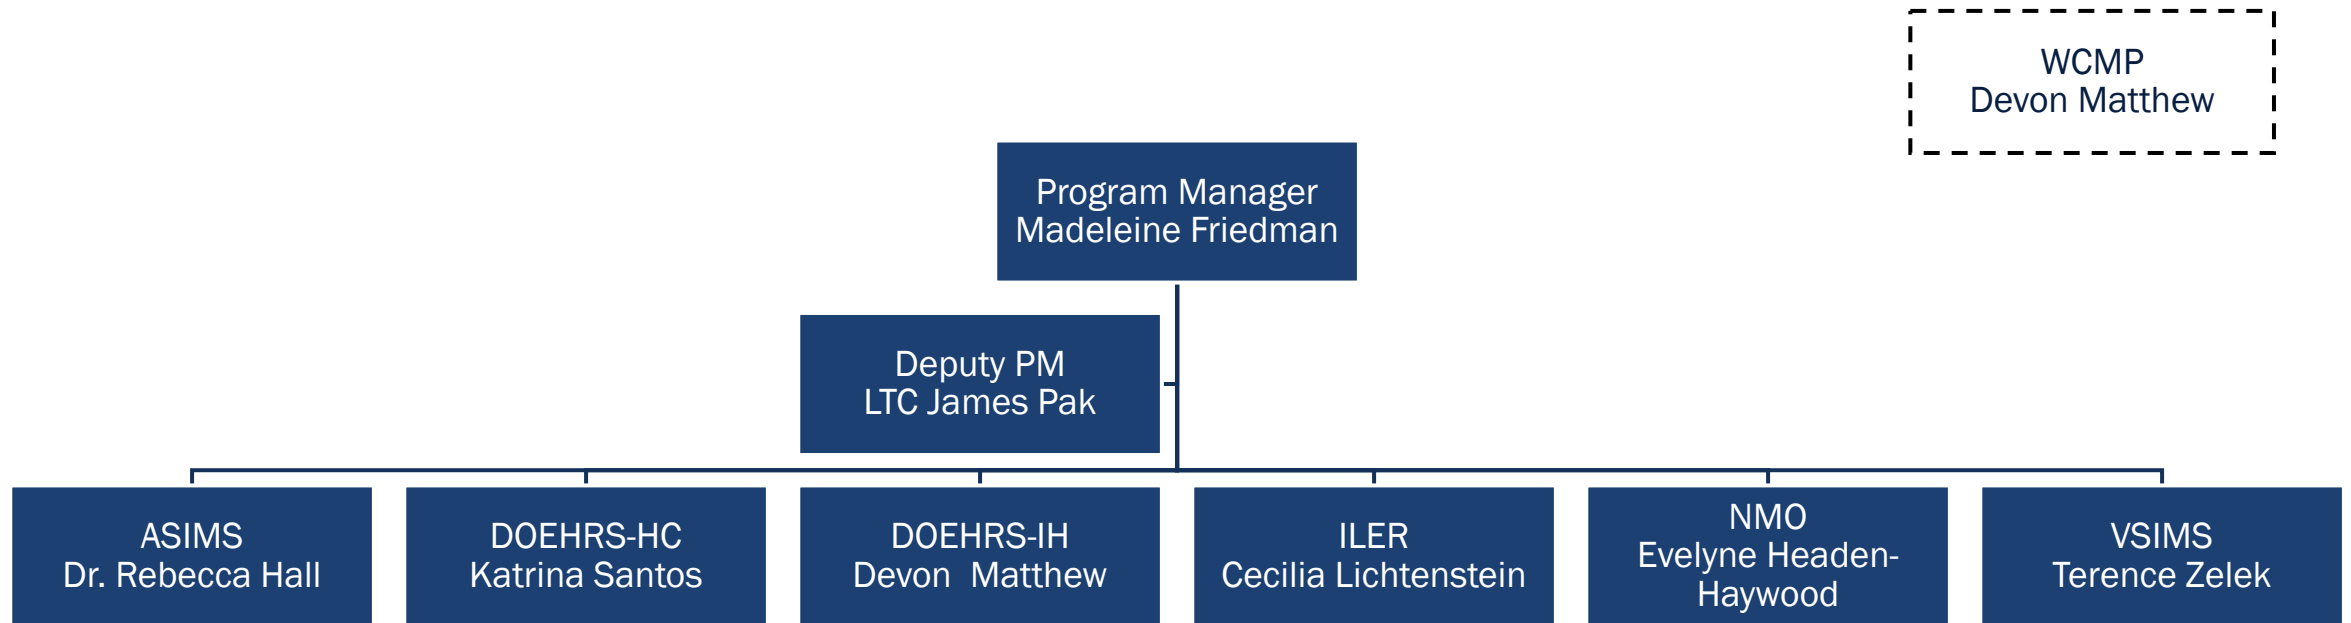

LOE 4 – Deliver the Healthcare Enterprise Beneficiaries Deserve

- Promote Health: The Defense Family will be able to live, work, and recreate, free of unnecessary risk. Military service will yield lifelong lifestyle, community, and health benefits to the future force and their families.

OEHSR Programs

- Aeromedical Services Information Management System (ASIMS)
- Defense Occupational and Environmental Health Readiness System – Hearing Conservation (DOEHRS-HC)
- Defense Occupational and Environmental Health Readiness System – Industrial Hygiene (DOEHRS-IH)
- Individual Longitudinal Exposure Record (ILER)
- Navy Medicine Online (NMO)
- Veterinary Service Information Management System (VSIMS)
- Warfighter Cognitive Monitoring Program (WCMP)

Occupational and Environmental Health Surveillance Readiness (OEHSR) PMO Organizational Chart

Aeromedical Services Information Management System (ASIMS)

ASIMS is a web-based, modernized, and integrated application that allows senior U.S. Air Force and U.S. Space Force leaders and commanders, active-duty personnel, Air National Guard, and Air Force Reserve members to monitor force health and mission readiness in non-deployed and deployed settings.

High Level Conceptual Model (OV-1)
Aeromedical Service Information Management System (ASIMS)

Aeromedical Service Information Management System (ASIMS)
MHS v. 17.0
Defense Health Agency (DHA), Solution Delivery Division (SDD)
Encyclopedia: ASIMS
Author: Lan-Khinh.Tran.ctr@health.mil
Approval: Matthew.R.Schnell2.civ@health.mil

This high level model depicts the utilization of the Aeromedical Service Information Management System (ASIMS) as a repository for readiness data and its utilization for reporting individual and unit deployable status.

Defense Occupational and Environmental Health Readiness System – Hearing Conservation (DOEHRS-HC)

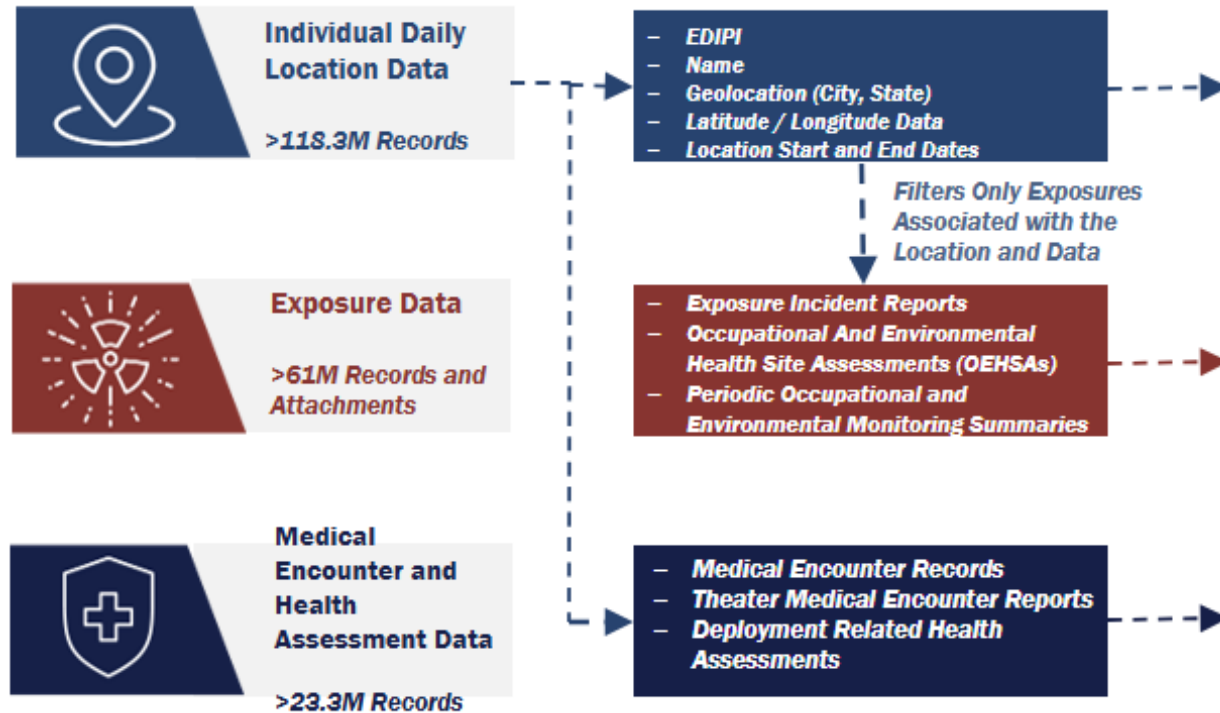

DOEHRS-HC is the DoW's designated information system used for monitoring audiometry (hearing tests) to detect changes in an individual's hearing sensitivity.

Defense Occupational and Environmental Health Readiness System – Industrial Hygiene (DOEHRS-IH)

DOEHRS-IH captures occupational and environmental health risk data, and actively monitors biological, chemical, and physical health hazards that impact DoW personnel worldwide. The system supports force health readiness and global operations.

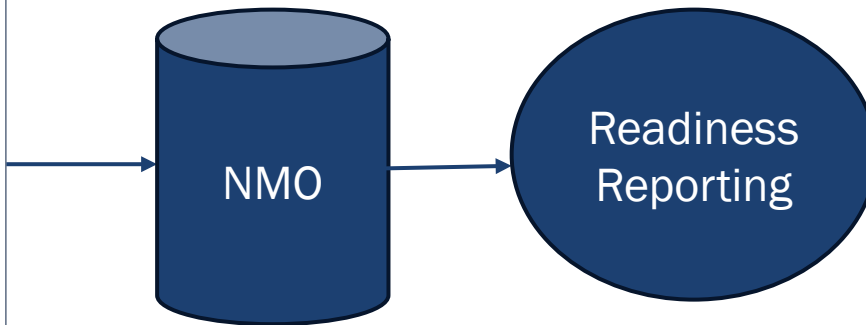

Individual Longitudinal Exposure Record (ILER)

ILER is a transactional web-based application that provides the DoW and Department of Veterans Affairs (VA) the ability to connect an individual to occupational hazards, ambient environmental monitoring data, and medical encounter information by date, time, place, and event(s) from multiple supporting systems.

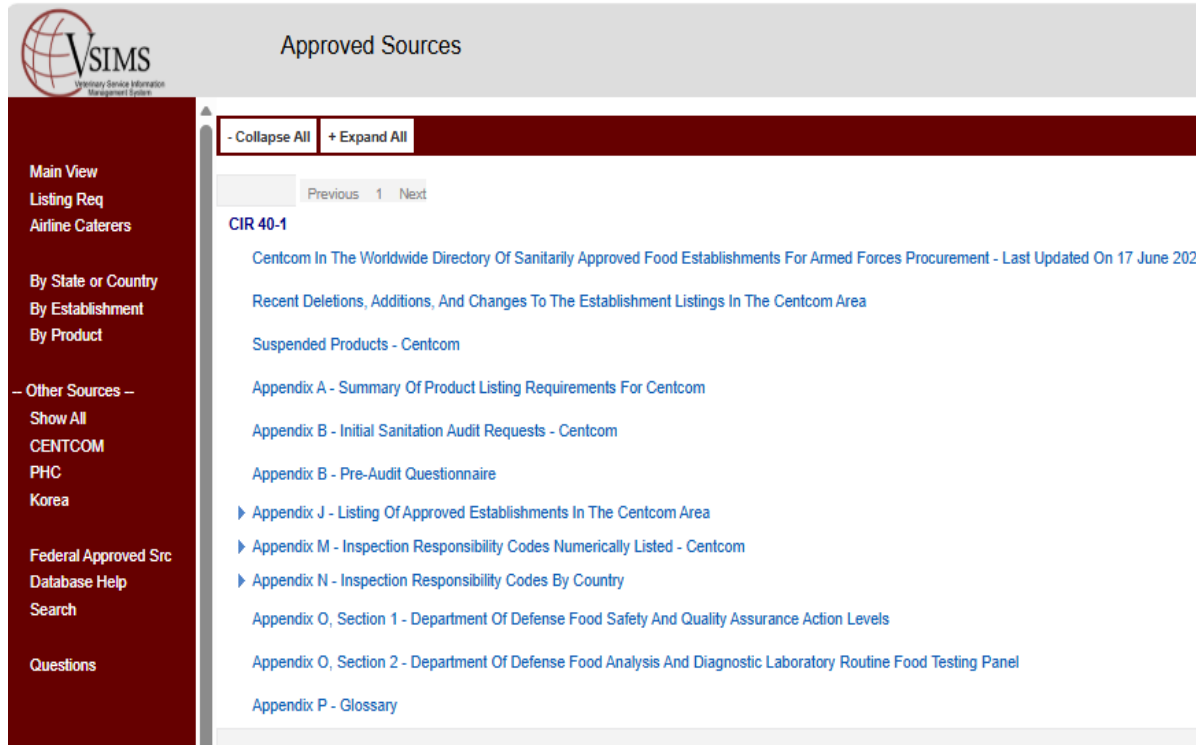

Navy Medicine Online (NMO)

- Medical Readiness
- Dental Readiness
- Health Assessments
- Personnel Data
- Accessions
- IMR

Navy Medicine Online (NMO) is a mission-critical platform consolidating Department of the Navy (DoN) medical and dental data into a centralized warehouse. It empowers operational commanders, medical staff, and academic leaders with real-time readiness reporting, automated case management, and global mission planning.

VSIMS is a global Tri-Service data application providing oversight, tracking, management, and analytic functions to ensure a safe food supply for DoW Warfighters and beneficiaries through food protection (food safety + food defense) programs.

Knowledge Check (True or False)

1. The PMO Vision's statement is *Lifelong Warfighter and DoW readiness: powered by data-driven health intelligence, ALWAYS!*
2. ASIMS monitors force health and mission readiness in non-deployed and deployed settings for the ARMY.
3. ILER provides enhanced visibility of exposure history, supporting earlier risk identification and more informed clinical decisions that sustains readiness.
4. VSIMS is a global Tri-Service data application providing oversight, tracking, management, and analytic functions to ensure food supply for DoW Warfighters and beneficiaries through food protection programs.
