Moving **HEALTH** *Forward*

NCCHCA's Clinical Conference on Quality and Chronic Disease taking place November 5-6, 2026 brings together clinical and administrative leaders committed to strengthening care, improving outcomes, and responding to the complex health needs of the communities they serve. This professional training event provides continuing education, practical learning, and meaningful networking opportunities for safety-net health care providers across North Carolina.

Nationally recognized health care experts will share emerging practices, cutting-edge trends, and proven quality improvement strategies across topics including maternal health, care beyond the clinic walls, value-based care, AI, information technology and analytics, and medications for opioid use disorder.

Sponsorship offers a valuable opportunity to connect with clinical and administrative decision-makers, increase your organization's visibility, and demonstrate your commitment to advancing quality, innovation, and healthier communities throughout North Carolina's safety-net.
