Overview

Stay ahead in digital dentistry with this focused course covering the latest trends, real-world case studies, and advanced workflows. Learn to compare guided vs. navigated surgery, optimize pre- and post-op records, and plan restorations for ideal outcomes. Explore digital temporization, photogrammetry, and the transition from conventional techniques to fully guided full-arch treatment with prosthetics. Finish with techniques for staining, glazing, and delivering final zirconia restorations.

Course objectives

- Describe the latest trends in All-on-4® digital cases and their clinical implications.
- Compare digital dentistry integration strategies, focusing on guided surgery versus navigated surgery workflows.
- Explain the importance of digital temporization in achieving successful full-arch outcomes.
- Evaluate the benefits of photogrammetry and navigation surgery compared to freehand techniques and chairside conversions.
- Identify methods to improve efficiency using the All-on-4® digital model.
- Assess the effectiveness of direct-to-patient marketing versus referral models for cases using the All-on-4® treatment concept.
- Analyze financial considerations and cost structures associated with the All-on-4® treatment concept.
- Demonstrate comprehensive full-arch case planning using digital planning and design software from a laboratory perspective.

Dr. Navneet Arora is a full-time clinician with practice limited to periodontics and implant dentistry. He is a board-certified diplomate of the American Academy of Periodontology and Implant Dentistry. In 2008, he finished his certificate in periodontics from the Eastman Dental Center at the University of Rochester Medical Center. He also received a master's in public health from Loma Linda University in Southern California. Dr. Arora lectures on various topics of implant dentistry, treatment planning, bone grafting, and soft-tissue management.
