AUTOCAMP

Nicer in Nature

AutoCamp is committed to preserving the places we inhabit and creating a culture of doing the most good with the people and practices that we employ.

We believe that connecting people with the outdoors builds a deeper appreciation for nature and an inherent desire to protect it. That belief shapes how we design our properties, how we operate every day, and who we choose to work with. We know there's always more we can do, and we're committed to continually improving how we show up for the land, our communities, and each other.

PEOPLE

We believe sustainability starts with the people who experience and care for our properties.

- We educate guests on environmental principles and everyday stewardship
- We fund grassroots conservation projects through an employee-led annual grant cycle
- We offer employees paid Adventure Days to explore the outdoors or volunteer for our mission
- We partner with local rangers and conservation groups for fireside chats and volunteer days
- We vet our brand and vendor partners for shared sustainability values

PLACES

We build and operate with respect for the land we're lucky enough to call home.

- We tuck accommodations into the land, preserving natural landscapes rather than reshaping them
- We partner with local organizations to minimize impact and restore ecosystems
- We prioritize reclaimed, recycled, and local materials in construction
- We operate onsite wastewater treatment that meets or exceeds local standards
- We provide EV charging and use downcast, energy-efficient lighting aligned with DarkSky standards
- We support public lands protection through our Conservation Alliance partnership

PRACTICES

Sustainability matters in our daily details, from what's in our Clubhouses to how we host events.

- We minimize single-use plastics with compostable supplies and water refill stations
- We use low-burning, spark-free campfire logs where required and promote responsible fire use
- We offer sustainable event options for groups, with vetted vendors and compostable or recycled supplies
- We source seasonal, local food, including dairy-free, vegetarian, vegan, and farm-to-fork options
- We use sustainable materials in retail apparel and marketing collateral, and prioritize digital programming to cut paper waste
- We standardize low-flow fixtures and native, low-irrigation landscaping to reduce water use and erosion

In Good Company

AutoCamp supports partner organizations who work to protect the places we inhabit through our partnership with The Conservation Alliance – the nation's largest coalition of businesses committed to conservation. Together, we're able to do more than we ever could alone.

Since 1989, The Conservation Alliance grants have helped:

- PROTECT 4,964 MILES OF RIVERS
- SAVE 125.5 MILLION ACRES OF WILDLANDS
- STOP OR REMOVE 44 DAMS
- DESIGNATE 5 MARINE RESERVES AND A NATIONAL MARINE SANCTUARY
- PURCHASE 22 CLIMBING AREAS

Our membership allows us to:

- Join a coalition of 200+ companies who understand that the future of business depends on a healthy planet
- Give our team the opportunity to propose, vote on, and award grants to grassroots conservation projects that directly protect the places we inhabit
- Bring our business voice forward to advocate on a range of conservation issues
