

ProcessAI

Supercharge Your SAP Processes with AI

Jon Gilman | Chris Styduhar

Introduction to ProcessAI

At ProcessAI, we drive business value by **automating complex** SAP business processes using AI and your existing Microsoft software stack.

Our experienced team works with you to realize a 10-20X ROI through productivity gains and cost savings from more efficient operations and lower software licensing costs.

We don't just 'add' AI —

We transform your SAP workflows using the Microsoft tools you already own

Who is ProcessAI?

ProcessAI is your Force Multiplier

Let the experts from ProcessAI leverage their deep experience, pre-built accelerators and to provide 10X the value in half the time at a quarter of the cost of standard professional services.

The ProcessAI Edge

ProcessAI's founders bring a combined 40 years of SAP, Microsoft, AI and Process Automation experience to bear. They've delivered over a hundred successful technology-forward business and strategy projects (for the majority of the Fortune 100), generating billions in value from direct revenue / growth and cost savings.

Founder and CEO: Clear Software, Ex-Microsoft (GM of Power Platform), Ex-Accenture, Ex-E&Y

SAP Automation Savant

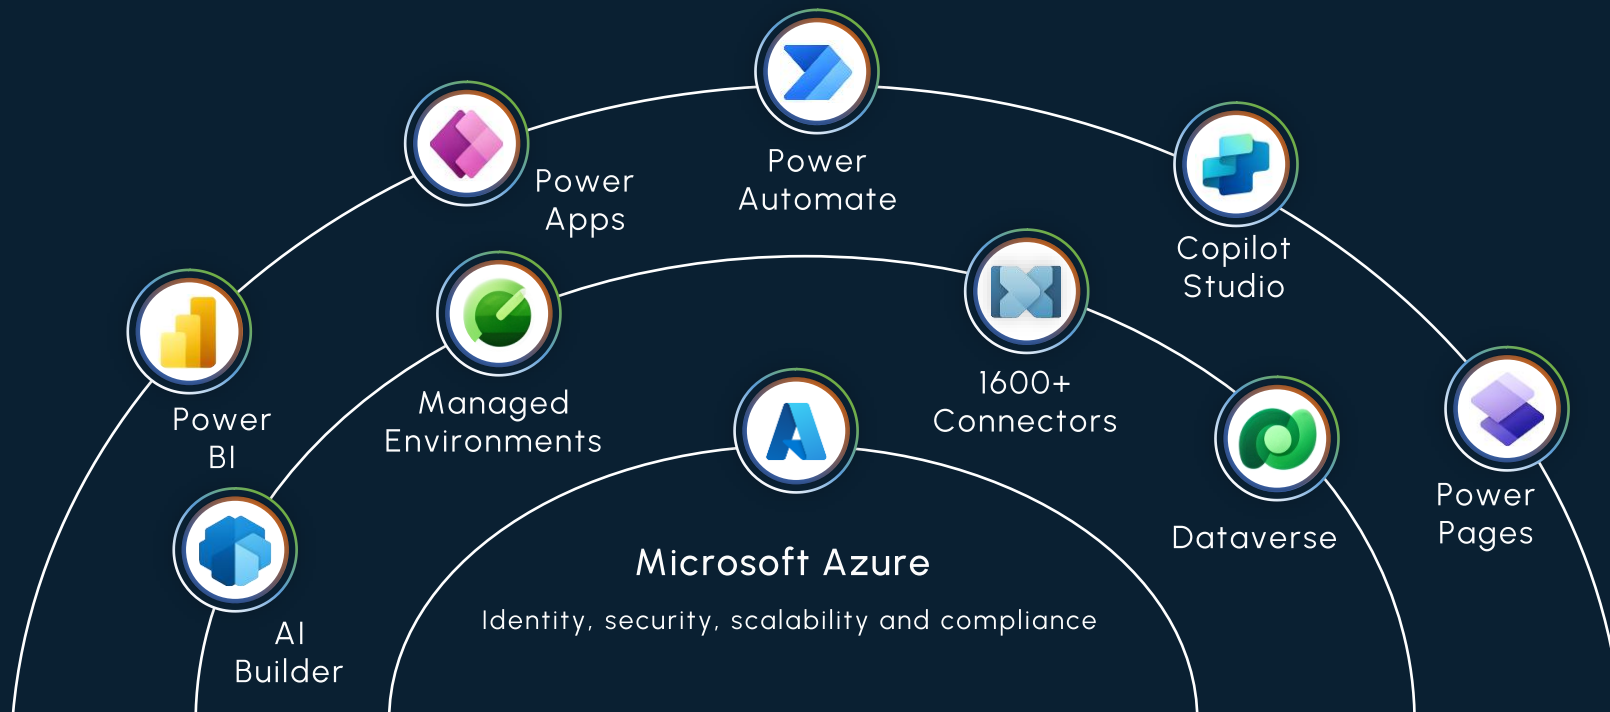

Chris Styduhar – Principal

Founding Executive: Accenture Information Management Services, Ex-Google, Ex-Amazon, Head of Product / Multiple Startups

AI and Digital Product Savant

Innovate At Scale

Microsoft's Power Platform Transforms All Areas of Your Organization

Value Drivers: ROI Focus

Create millions of dollars in value from improved efficiency and reduced software licensing costs

30%

Reduction in Procurement / Order Processing Time

Quicker, more efficient procurement, order processing and other business processes realizes 5-10% savings across total company spend.

\$500K-\$5M

Reduction in Software Licensing

Leverage your existing Microsoft licenses for process automation and AI enablement instead of paying for redundant point solutions.

30-50%

Productivity Gains

Knowledge workers dedicate their energy to value-added activities once repetitive processes are automated

\$10-20MM

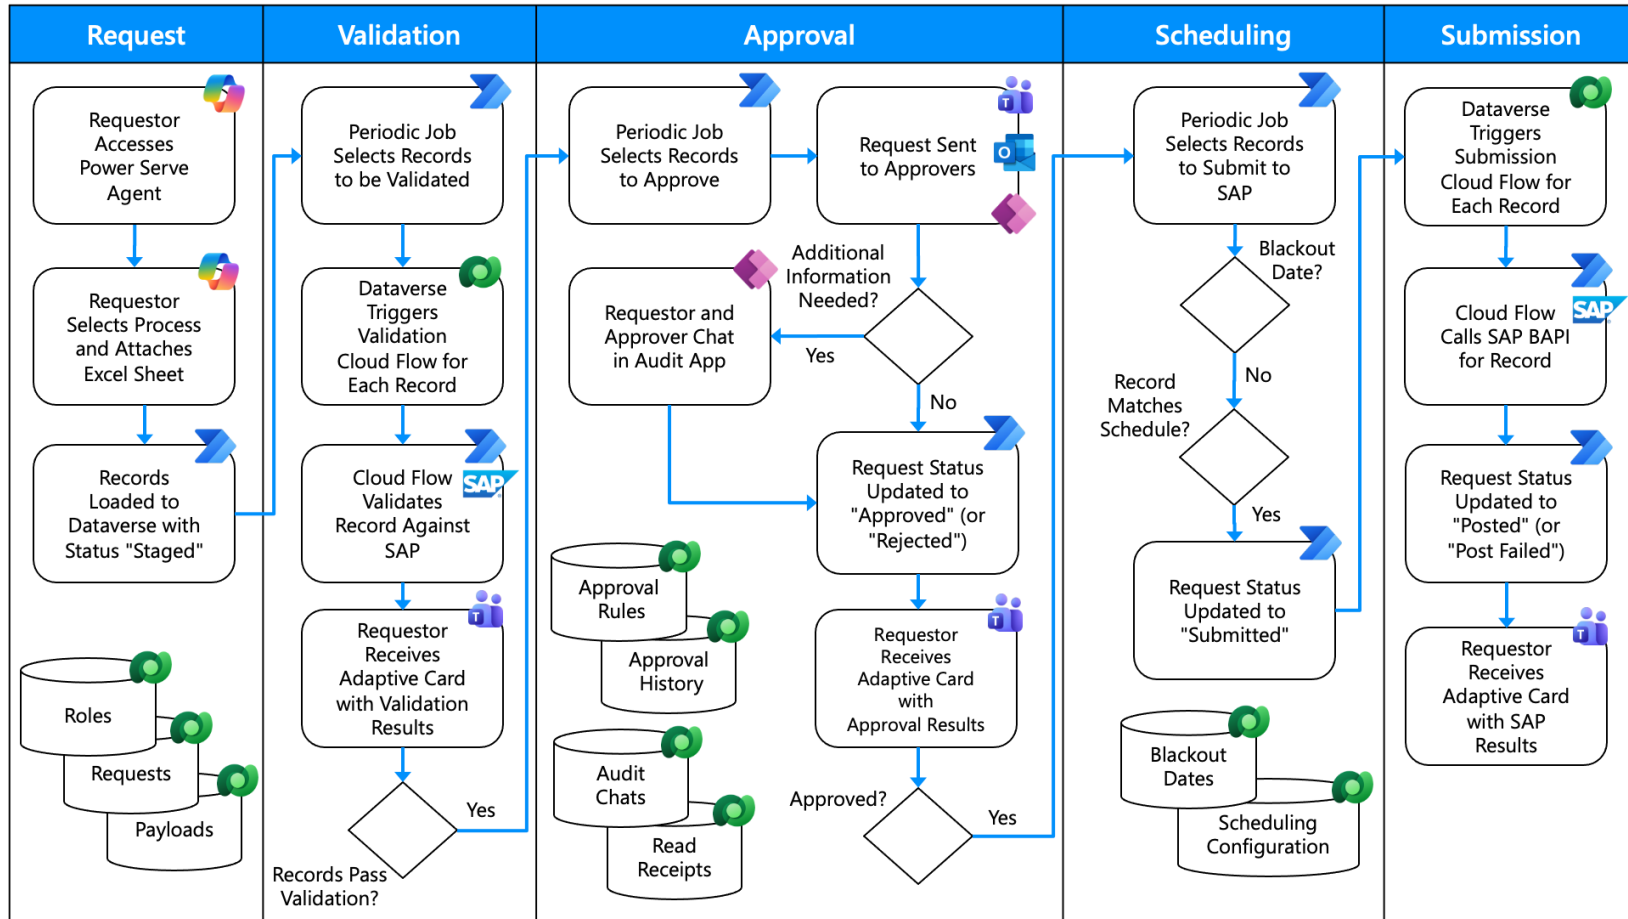

Accelerated Custom Software Development

Enable your engineering teams to build more value-added, user-facing capabilities when Process AI implements your process flows and apps

About EY

- Largest accounting firm in the world
- Over 400,000 employees
- Largest Winshuttle user in the world
- Over 130 scripts covering mission-critical business processes
- Were spending over \$10M a year on licensing and other related costs
- Wanted something easier to use and easier to maintain, all while reducing costs

Case Studies

Offline Maintenance

- AI model trained on millions of service manuals
- Mobile Power App allows offline confirmations
- All maintenance can be done on mobile phone

VISUAL COMFORT
& Co.

Order-to-Cash

- Replaced manual order entry with Copilot
- 100% elimination of manual data entry
- 99% reduction in order entry time!!

Loves

Procure-to-Pay

- Overhauled P2P with Copilot and Power Platform
- 90% reduction in time to update vendor pricing
- Automated 3-way match with Copilot Agent

ADAMA Manufacturing

- Replaced 60 SAP screens with 1 Power App
- 90% reduction in process order data entry
- \$10M avoided in custom Fiori development

Typical Engagement

3-Step process leverages accelerators to reduce time-to-value

01

Analysis

(1 week)

Proprietary AI diagnostic toolkit pinpoints inefficiencies in HR, Finance, and Supply Chain processes

02

AI-Powered Optimization

(4 weeks per script / 15-step process)

Proprietary AI diagnostic toolkit pinpoints inefficiencies in HR, Finance, and Supply Chain processes

03

Continuous Improvement

(post-implementation)

Adaptive AI agents monitor activity to identify and implement further optimizations automatically
