Disclosure: Session C4

In compliance with continuing education requirements, all presenters must disclose any financial or other associations with the manufacturers of commercial products, suppliers of commercial services, or commercial supporters as well as any use of unlabeled product(s) or product(s) under investigational use.

CDC, our planners, content experts, and their spouses/partners wish to disclose they have no financial interests or other relationships with the manufacturers of commercial products, suppliers of commercial services, or commercial supporters.

Planning committee discussed conflict of interest with each presenter to ensure there is no bias.

Content will not include any discussion of the unlabeled use of a product or a product under investigational use.

CDC did not accept commercial support for this continuing education activity.
2019-2013 Immunization and Vaccines for Children Cooperative Agreement Update

Immunization Services Division
Program Operations Branch
Program Effectiveness – Underlying principles

- Focus on overarching coverage-related outcomes
  - Program effectiveness=high vaccination coverage
- Maximize relevance to individual awardees
  - Awardees lead the activities
- Allow for flexibility
- Allow awardees to take advantage of other IPOM activities to satisfy requirements
- Encourage awardees to share with each other
Overview of B1 and B2 requirements

- **Budget Year 1**
  - Emphasize identifying population subgroups with low coverage
  - Lay the foundation for the 5-year project period

- **Budget Years 2-5**
  - Emphasize implementation of programmatic activities to address low coverage
Chapter B - IPOM 2019 B1 and B2 requirements

- **B1**: Identify geographic areas or population subgroups with low vaccination coverage
  - Describe the populations
  - Describe the data sources used to estimate coverage
  - Make recommendations to enhance, replace, or add data sources

- **B2**: Perform activities to improve vaccination coverage within population subgroups
  - Describe recent activities to improve coverage
  - Share and learn with other awardees
  - Select a target population and plan a programmatic activity
Overview of IIS-NIS Integration

- Response rates to surveys are declining, and costs increasing
- CDC developed a four-phase plan to integrate IIS and NIS
  - Maintain comparability of national and awardee level vaccination coverage estimates over time and across awardees
- 1st phase augments NIS sample with phone numbers from IIS
  - Requires data sharing agreement between awardee and NIS contractor
  - Awardee uploads files with phone numbers for NIS eligible children to NIS contractor before each data collection quarter
- Fourteen awardees participating in first wave with 2019 NIS data collection
  - CDC paying for optional IIS phone number locating and IIS-NIS match
Strategy B3 Required Activities

- **B3a.** Identify steps that could be taken to increase the percentage of IIS records for children ages 0 through 17 years with at least one telephone number (See Appendix K)

- **B3b.** Develop data use agreements that will allow CDC’s NIS contractor to use selected patient information from children in the IIS to conduct the NIS (See Appendix K)

- Required Performance Measures
  - IIS-NIS Integration Tool

- Possible future requirement B3c, to participate in IIS-NIS integration unless prevalence of phone numbers in IIS is below a CDC-specified level, or if data sharing is not possible
What is the path to full IIS-NIS integration?

**Phase 1**
- IIS augments the NIS cell phone sampling frame; from augmented sample: 1) collect uniform set of sociodemographic information, and 2) identify child’s vaccination providers
- NIS vaccination data from the NIS provider record check process (PRC)

**Phase 2**
- IIS as the only sample frame (drop the random digit dialing cell phone sampling frame): 1) collect uniform set of sociodemographic information, and 2) identify child’s vaccination providers
- NIS vaccination data from the PRC

**Phase 3**
- IIS as the only sample frame: 1) collect uniform set of sociodemographic information, and 2) identify child’s vaccination providers
- NIS vaccination data from the PRC and IIS

**Phase 4**
- IIS as the only sample frame: 1) collect uniform set of sociodemographic information, and 2) drop collection of child’s vaccination providers
- NIS vaccination data only from the IIS (drop the PRC)

2019-2023
Cooperative Agreement Overview

Elizabeth Sullivan
Funding Lead, Program Operations Branch
Immunization Program Operations Manual (IPOM)

- IPOM is companion document to the notice of funding opportunity (NOFO)
  - Provides additional details to help support programs
- ISD/POB received feedback about the 2013-2018 IPOM
  - Hard to follow with program areas blended in different sections
  - Need clearer guidance on required activities
  - Would like more flexibility to meet requirements
  - Prioritization of activities requested
- 2019-2023 IPOM Highlights
  - Reorganized information
  - More intuitive format/structure
IPOM Organization - 2013 versus 2019

- **2013-2018 IPOM, 5 sections**
  - Program Stewardship and Accountability
  - Assessing Program Performance
  - Assuring Access to Vaccines
  - Immunization Information Technology Infrastructure
  - Improve and Maintain Preparedness

- **2019-2023 IPOM, 12 sections**
  - Program Management and Sustainability
  - Program Effectiveness
  - Vaccine Access and Management
  - IIS and Technology
  - Communication, Partnership, and Education
  - Provider Quality Improvement
  - Surveillance and Outbreak Response
  - Perinatal Hepatitis B Prevention
  - School Vaccination Coverage
  - Adolescent Immunization
  - Adult Immunization
2019 – 2023 Cooperative Agreement Kickoff Meeting

- To be held January 23-25, 2019
  - CDC Roybal Campus, Atlanta
  - 3 full days of program discussion
- Detailed explanation of program area and requirements
  - Presentations by subject matter staff for each program area
  - Questions and answers session for each area
