ISACA Western Michigan Chapter

The Institute of Internal Auditors

2026 WMISACA/WMIIA In-Person Joint Seminar

Matt Kipp

Since joining the cybersecurity team at Centric Consulting over 8 years ago, Matt has had the opportunity to work with a variety of clients on a wide range of engagements including IAM, risk assessments, and IT audit assistance. Before joining Centric, Matt worked for a fortune 500 financial service organization as well as a fortune 50 manufacturing organization. When combined with my experience at Centric, Matt has over 20 years of experience in security. His focus at Centric is assisting organizations to get the most out of their IAM controls and improve efficiencies within this space. He also ensures that clients understand their cyber posture while using the numerous cybersecurity frameworks available.

Jean Onyuro

Jean is a master's student in Cybersecurity at Grand Valley State University and an AI in Cybersecurity researcher. Her graduate work focuses on adversarial threats to large language models. Jean completed the MIT AI Alignment (MAIA) AI Safety Fundamentals fellowship, where she studied AI threat models, deceptive model behavior, and techniques for overseeing AI systems. Jean also works in desktop support with GVSU IT Services alongside her role as a student researcher and is pursuing a career in GRC and IT audit.

Fannie Moore

Fannie serves as Wayne State University's Director of Forensic Audits and Training. She holds a Bachelor of Science in Business Management from Southern University in Baton Rouge, Louisiana, and a Master of Business Administration in Human Resource Management from Davenport University in Grand Rapids, Michigan. In her role, Fannie oversees special investigations, operational audits, the university's anonymous tip webpage, the fraud hotline, and awareness training. She also mentors college students on fraud methodologies, helping develop future fraud professionals and encouraging interest in the field. Outside of work, Fannie enjoys mentoring college students on fraud methodologies to help develop future fraud fighters and spending quality time with her family.

Jacqueline Tomei

Jacqueline Tomei is an AI Governance Consulting Manager who helps organizations turn complex AI, data, and regulatory challenges into practical, enterprise-ready governance programs. With more than a decade of experience across Big Tech, healthcare, life sciences, financial services, and nonprofit organizations, she advises executive leadership, Boards of Directors, and cross-functional teams on responsible AI adoption, regulatory alignment, data stewardship, and governance program maturity. Jacqueline is recognized for translating evolving regulatory expectations and business priorities into actionable policies, controls, operating models, and workflows that strengthen accountability, support innovation, and align technology use with organizational risk appetite. She holds a Master of Science in Regulatory Compliance from Northwestern University, a Bachelor of Science in Biomedical Science from Auburn University, and the Certified in Healthcare Compliance (CHC) credential through the Compliance Certification Board (CCB)®.

Haripriya Venkatachalapathy

Haripriya "HP" Venkatachalapathy is a Staff Information Security Analyst at Sony Interactive Entertainment, where she focuses on technology risk, third-party risk management, and security governance. She works across security, legal, procurement, technology, and business teams to translate risk findings into practical decisions, mitigation strategies, and ongoing oversight. Her recent work includes governance challenges introduced by AI and complex technology supply chains. She holds an M.S. in Cybersecurity and is a Certified Information Security Manager (CISM).
