

Daniel Sperling is Professor of Civil Engineering and Environmental Science and Policy, and founding Director of the Institute of Transportation Studies at the University of California, Davis. He also holds the transportation seat on the California Air Resources Board, where he plays a prominent role in designing and adopting climate policies for vehicles, fuels, and urban travel. He received a 2010 Heinz Award for his “achievements in the research of alternative transportation fuels and his responsibility for the adoption of cleaner transportation policies in California and across the United States.”

Prof. Sperling is recognized as a leading international expert on transportation technology assessment, energy and environmental aspects of transportation, and transportation policy. He was recent chair of the Davos World Economic Forum’s Council on “Future of Mobility” and the U.S. Transportation Research Board’s standing committees on Sustainable Transportation and Alternative Fuels.

He is author or editor of 250 technical articles and 12 books, including *Two Billion Cars*, has testified many times to the U.S. Congress on alternative fuels and advanced vehicle technology, and serves on senior advisory committees for international energy and car companies and research centers, including the International Advisory Council for the King Abdullah Petroleum Studies and Research Center (KAPSARC).

He earned his Ph.D. in Transportation Engineering from the University of California, Berkeley and his B.S. in Environmental Engineering from Cornell University.
