The Vaccine Handbook: A Practical Guide for Clinicians (“The Purple Book”) is a uniquely comprehensive source of practical, up-to-date information for vaccine providers, educators, and advocates. It draws together the latest vaccine science and guidance into a concise, user-friendly, practical resource for the private office, public health clinic, academic medical center, hospital, and classroom.

The Vaccine Handbook provides

- Vital information on every licensed vaccine in the United States;
- Rationale behind authoritative vaccine recommendations;
- Contingencies encountered in everyday practice;
- Advice on how to address concerns about vaccines;
- Background on vaccine policy and infrastructure;
- Standards and regulations;
- Office logistics, billing procedures, and much more.

The seventh edition is printed in color and contains information updated through early 2018.

FROM THE FOREWORD:

“The Purple Book is a tried and true, concise, user-friendly compendium of pretty much everything you need to know to engage in vaccine practice. TPB is the next best thing to having a personal vaccine expert on speed dial... or in the office next door. I have both, but I still use TPB on a regular basis (there’s also a copy in our clinic and one in the fellow’s welcome packet).”

Kris A. Bryant, MD
President-Elect, Pediatric Infectious Diseases Society

New edition available for 2018!

About the Author
Gary S. Marshall, MD, a professor of pediatrics at the University of Louisville School of Medicine in Kentucky, serves as chief of the Division of Pediatric Infectious Diseases. In addition to being a busy clinician, he is nationally known for his work in the areas of vaccine research, advocacy, and education.
