

Powering Today, Shaping Tomorrow

Chintan Patel
CTO & VP Solutions Engineering,
Cisco EMEA

The pace of technology innovation is
evolving faster than anyone thought
possible

Four market forces

Inference is the new workload

Agents are the new workforce

Tokens are the new currency

Control is the new advantage

Responding to these forces requires getting three things right

**Scaling AI securely
and economically**

**Empowering and securing
a human and agentic
workforce**

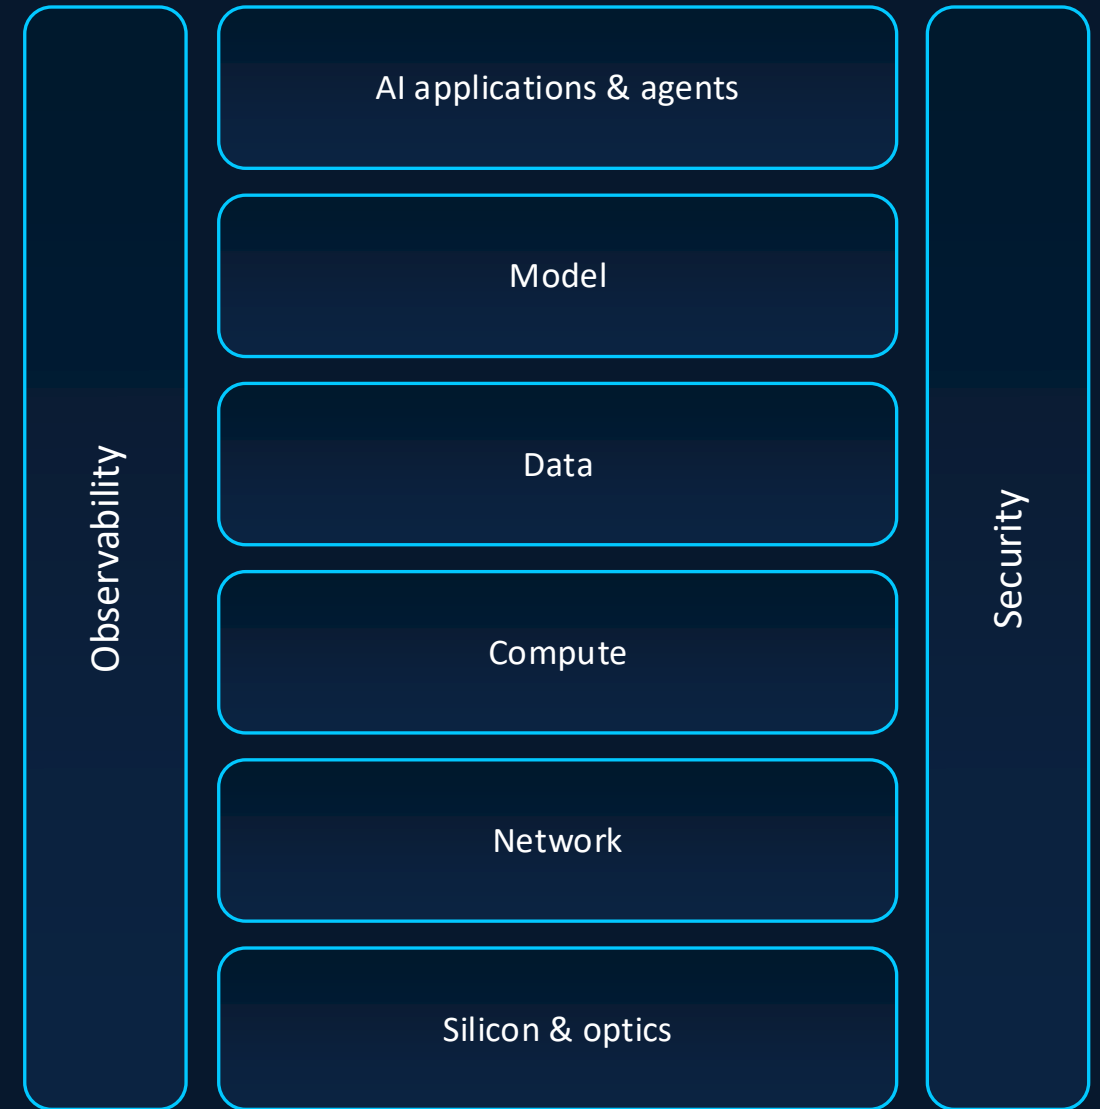

**Managing risks
that have escalated
beyond human scale**

Every agent action is a routing challenge,
a trust decision, and a telemetry event

Cisco is reimagining how we operate
to meet this moment

for AI**

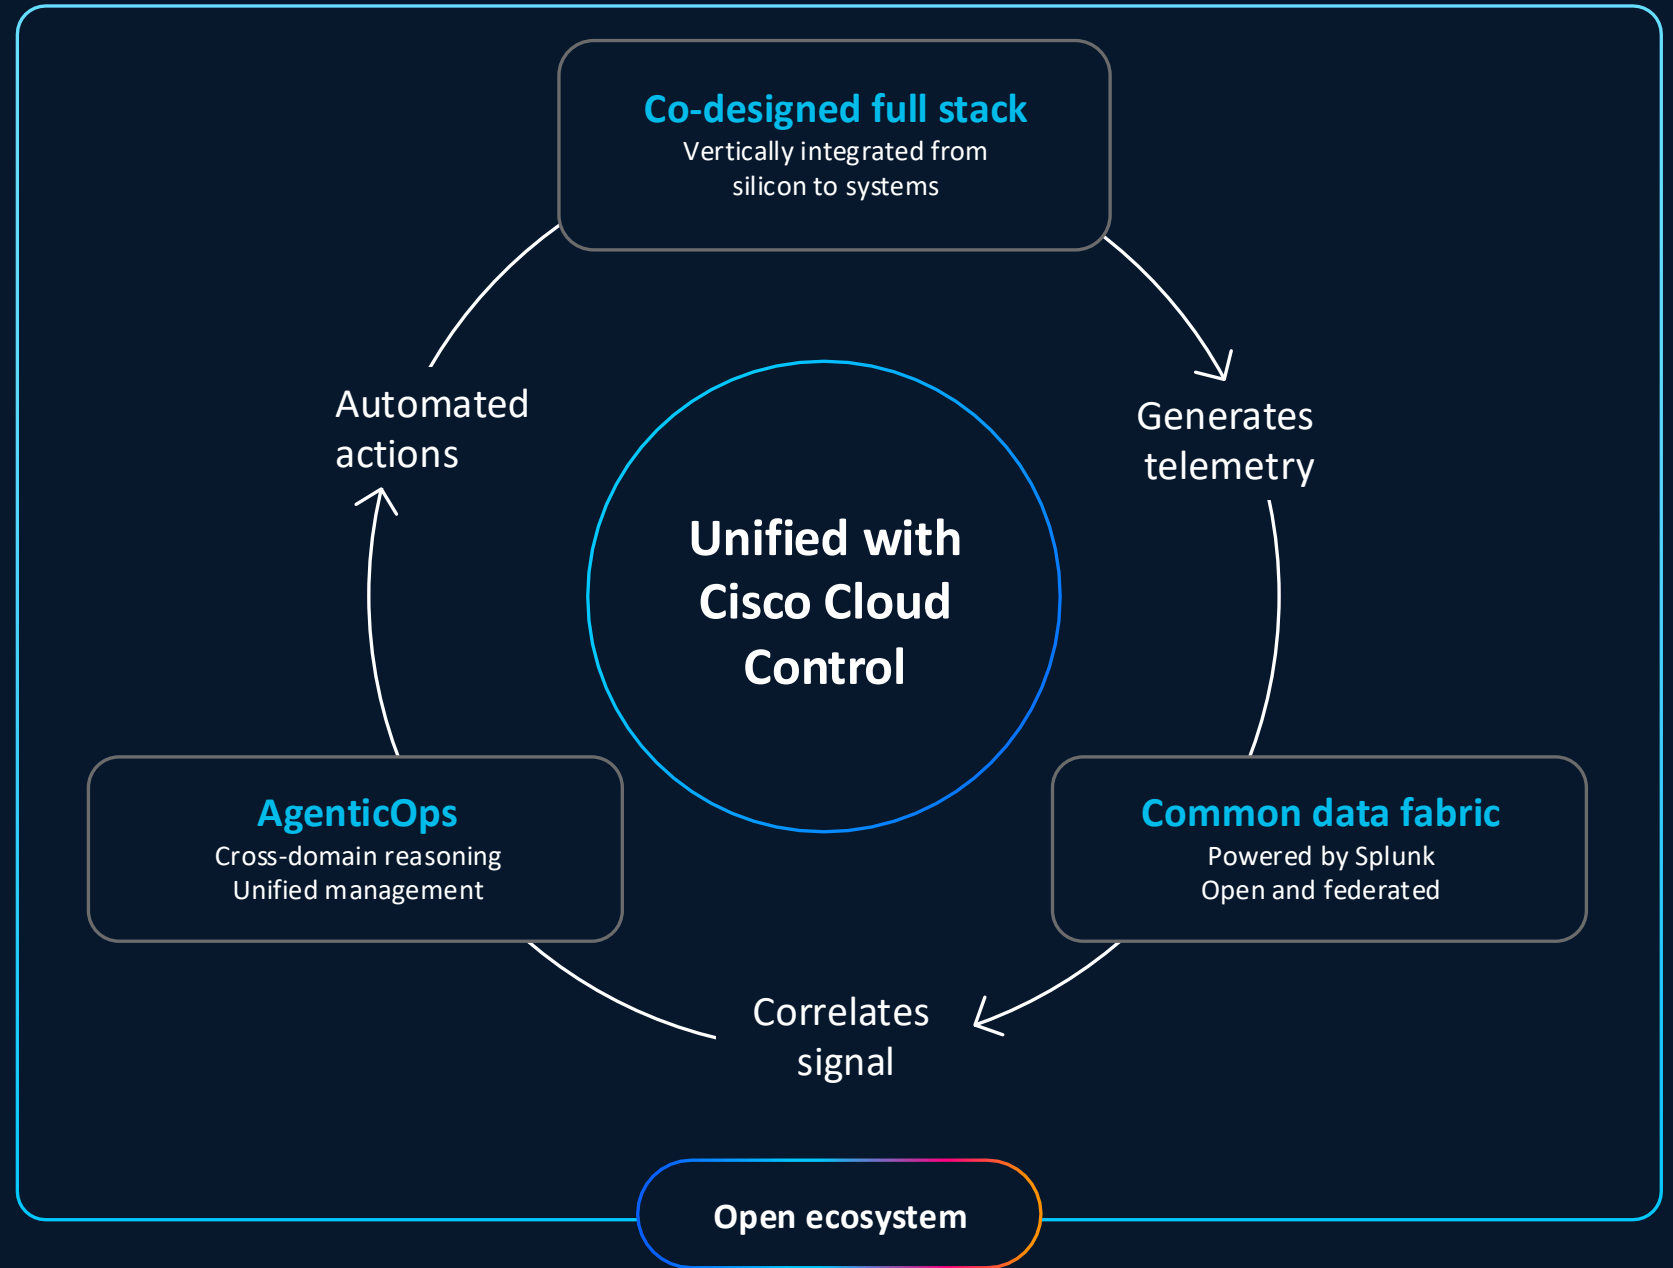

**Reimagine security
operations**

Building digital trust

Platform advantage: Unique capabilities compound value

An aerial night photograph of the Golden Gate Bridge in San Francisco. The bridge's iconic orange-red towers and suspension cables are brightly lit, spanning the dark blue waters of the Golden Gate. The surrounding city is a dense mosaic of warm yellow and orange lights, reflecting on the water's surface. The sky above is a deep, dark blue, suggesting twilight or early night.

Cisco is building the critical infrastructure for
the AI era

A night sky with the Milky Way galaxy visible over a dark, silhouetted landscape. The text "Together, we are powering today, shaping tomorrow" is centered in the sky.

Together, we are powering today,
shaping tomorrow
