

Digitise Physical Annotations into Webex Digital Board Distance Learning | Consultations | Interactions

What is Cisco and JIBB solution:

- Cisco, in partnership with JIBB AI software, uses AI and a Webex room camera or a regular device camera to digitise annotations from paper, Whiteboard, Glass board, Flipchart in real time. This integration allows you to share content seamlessly via Webex video conferencing, supporting use cases such as medical remote consultations, distance learning classes, and virtual services for citizens. Why customers are investing:

- Healthcare, education, and government organisations are adopting technology solutions to efficiently digitise meeting notes and securely share confidential information through virtual collaboration platforms like Webex. By integrating remote and in-person collaboration, these organisations can achieve greater productivity and innovation.

Main Use cases and Applications:

Digitise content from physical annotations	Interactive Online Learning	Remote Learner interaction	Board Content Capture
JIBB can turn any physical notes on paper or on a whiteboard into the centrepiece of the blended learning experience	JIBB can share handwritten content in real-time through Webex	Webex user can interact with content through digital whiteboard	Saved lectures and notes are easily accessible for review, enabling students to revisit complex concepts and reinforcing learning.

Key Benefits in Education | Healthcare | Government

Education	<ul style="list-style-type: none"> Enhance student experiences and teaching productivity in hybrid and distance learning environments, and student support. See Case Study for Remote Collaboration
Healthcare	<ul style="list-style-type: none"> Improve flexibility and productivity in remote consultations, improving efficiency, patient satisfaction, and care outcomes.
Government	<ul style="list-style-type: none"> Strengthens communication for government agencies, ensuring reliable, efficient, and secure operations to better meet citizen needs.

How JIBB integrates with Cisco:

- JIBB seamless integrates with Webex Calling and UC solutions [See more here](#)
