

Shaping the Future of DOHaD in ANZPac

Join us for an interactive workshop to help shape the future direction of DOHaD across Australia, Aotearoa New Zealand, and the Pacific. Together, we will identify priorities for research, policy, implementation, and partnership over the next five years.

Through facilitated discussions, participants will explore four key themes: community and consumer partnership, health equity, Indigenous and Pacific leadership, and translation into policy and practice. We will build on existing strengths, identify opportunities for impact, and develop priorities to inform the ANZPac DOHaD Roadmap for Equity, Partnership and Impact (2026-2031). Whether you are a researcher, clinician, policymaker, trainee, or community representative, your voice can help shape the next chapter of DOHaD in our region.
