

First Name	Last Name	Company Name	Country	Abstract title	Poster Nr
Radit	Aditirta	The Francis Crick Institute	United Kingdom	Investigating the effects of pathogenic TGFBR2R528C in an in vitro Loeys-Dietz syndrome model	1
Mohammed	Alsuraih	Scholar Rock Inc.	USA	Selective targeting of matrix TGF- β 1 is an attractive approach to attenuate the progression of pulmonary fibrosis	7
Benney	Argue	Northwestern University	USA	Single-Cell Long-Read Sequencing Reveals Novel TGF β -1 Isoforms	5
Sepideh	Azizi Taramsary	Adelaide university	Australia	TGF- β Signalling Governs Quiescence and Chemoresistance in CD123high Leukemic Stem Cells	4
Helen	Bell	Qkine	United Kingdom	New recombinant activins for a complete picture of receptor binding and activity	6
Katja	Breitkopf-Heinlein	University of Heidelberg	Germany	Bone Morphogenetic Protein (BMP)-9, a systemic homeostasis factor with diverse functions in the liver and beyond	2
Evan	Buddle	McGill University	Canada	TGFBR3L function and glycosylation are conserved in inhibin B-producing mammals	9
Chun-Lin	Chen	National Sun Yat-sen University	Taiwan	Dexamethasone-induced T β R3 upregulation suppresses tumor invasion	8
Daniel	Constam	Ecole Polytechnique Fédérale de Lausanne (EPFL)	Switzerland	Genetic identification of the receptors and cells mediating activin A-induced tumor immune evasion	10
Brandon	Courteau	University of California, San Francisco	USA	Architecture of an activated BMP receptor kinase heterotetramer	11
Nadia	Davis	University of Glasgow	United Kingdom	Investigating the roles of transforming growth factor- β mimics in lung epithelial repair and fibrosis regulation	12

Vasso	Episkopou	Imperial College London	United Kingdom	NODAL level-dependent derepression and signaling dynamics in the regulation of anterior-posterior responses and patterning	13
Tarsis	Ferreira	University of Houston	USA	Isoform-Specific TGF- β 1 Antagonism via De Novo Protein Design for Targeted Fibrosis Inhibition	14
Hao	Fu	Nagoya University	Japan	Onecut2 is a novel Smad cofactor that reprograms pancreatic ductal adenocarcinoma	16
Melissa	Gouge	University of Cincinnati	USA	Distinct dimerization of DAN family member, SOSTDC1, reveals novel mechanism for bimodal regulation of Wnt signaling	15
Gao	Guo	University of Alabama at Birmingham	USA	SDC2 functions as a molecular switch regulating TGF- β Signaling in non-EGFR amplified glioblastoma	17
Md Abu	Hanif	Norwegian University of Science & Technology	Norway	BMP-SMAD Signaling Enhances Selinexor Potency to Induce Apoptosis in Multiple Myeloma	18
James	Heiserman	The University of California, San Francisco	USA	Dissecting mechanisms of tumor immune checkpoint blockade resistance caused by host genetic variation within Adam17	20
Yoav I.	Henis	Tel Aviv University	Israel	Dynamics of assembly, stabilization and maturation of multiphasic TAZ biomolecular condensates	19
Cynthia	Hinck	University of Pittsburgh	USA	Leveraging protein design for new targeted therapies for hereditary hemorrhagic telangiectasia	21
Drew	Howard	Beth Israel Deaconess Medical Center & Harvard Medical School	USA	Engineered Anti-Müllerian Hormone with enhanced biochemistry and contraceptive function	23

Vincent	Idone	Regeneron Pharmaceuticals Inc.	USA	Clearance of Activin A via Activin A-ACVR1 non-signaling complexes is required for normal ovarian follicle maturation	24
Gareth	Inman	CRUK Scotland Institute	Scotland	TGF-beta pro-proliferative signalling in squamous cancers	25
Amy	Isaac	University of Cincinnati	USA	Design and characterization of de novo ligand traps and fusions to selectively inhibit activin ligands	26
Yuka	Itoh	Nagoya City University	Japan	Functional analysis of a constitutively active Smad3 mutant identified in patients with melorheostosis	27
Heeseog	Kang	University of Texas Southwestern Medical Center	USA	A TGFβ–metabolic–epigenetic axis controls sex-biased heterotopic ossification	29
Take	Katagiri	Saitama Medical University Advanced Research Center	Japan	Intracellular type I receptor dimerization couples ligand binding to TGFβ family signaling	28
Jeremy	Kessler	University of Geneva	Switzerland	New aspects of TGFβ signaling in muscle homeostasis and regeneration	30
Zeynep	Kocberber	Technische Universität München	Germany	Pmepa1-tgf-β signalling controls adipocyte function in obesity	31
Viet	Le	Boston Children's Hospital	USA	Redefining the selectivity landscape of inhibitors to TGF-β activating integrins for improved drug design	32
Marte Hoen	Lein	Department of Immunology and Transfusion Medicine, St. Olav's University Hospital, Trondheim, Norway	Norway	Endoglin (CD105) and TGF-β signaling in hematological cancers	33

Lorena	Lerner	Keros Therapeutics	USA	A novel bispecific myostatin/activin A antibody promoted an increase in lean mass and muscle strength, as well as improved body composition compared with ActRIIA/B inhibition	55
Lorena	Lerner	Keros Therapeutics	USA	A stable GDNF variant preserved muscle function and improved clinical outcomes in a mouse model of amyotrophic lateral sclerosis.	34
Wei	Li	University of Cambridge	United Kingdom	Endoglin as a BMP9 co-receptor in vascular endothelial cells: prodomain displacement and TGFBR11 recruitment	35
Charlotte	Mack	McGill University	Canada	Structure-function analysis of growth differentiation factor 11 binding to immunoglobulin superfamily member 1	37
Erik	Martinez-Hackert	Michigan State University	USA	Ligand-Independent Assembly of TGF- β Receptors Establishes a Structural Context for Signaling	36
Dorival	Mendes Rodrigues-Junior	Uppsala University	Sweden	Removal of Sialic Acid Enhances Integrin-Dependent Activation of Latent-TGF- β	38
Kohei	Miyazono	Graduate School of Medicine, The University of Tokyo	Japan	HVEM, a target of BMP signaling, accelerates growth and invasion of mesenchymal glioblastoma	40
Vamsee	Myneni	Keros Therapeutics	USA	Inhibition of activin A reduced fibrosis in mouse unilateral ureteral obstruction (UUO)	39
Emilia	Oksaranta	University of Helsinki	Finland	ActRIIA/B receptor blockade as a therapeutic strategy for cancer cachexia	41
Sydney	Parks	Baylor College of Medicine	USA	TGFBR2 is critical for regulating endometrial epithelial hyperplasia, endometrial tumor formation, and vaginal homeostasis	42

Valerie	Plesha	University of Cincinnati	USA	Biochemical analysis of cysteine mutations in the divergent anti-müllerian hormone prodomain	43
Lena	Quambusch	University of Cambridge	United Kingdom	Unlocking the Druggability of Activin A Through Fragment-Based Screening	44
Aravind	Ramakrishnan	Boston Children's Hospital	USA	Distinguishing signaling responses between latent TGF- β presenting cells, activating cells, and bystander cells	45
Sushil	Rane	National Institutes of Health	USA	TGF- β signaling coordinates β -cell secretory dysfunction and visceral adipose remodeling in metabolic disease	46
Pablo	Reed-Prieto	University of Cincinnati	USA	Refolding and purification of activins C and E in <i>E. coli</i>	47
Nate	Sanford	University of Pittsburgh	USA	Identification of amino acid motifs responsible for partial processing of the BMP9/BMP10 heterodimer	48
Julie	Sitolle	Université Lyon 1	France	TGF β signaling modulates muscle stem cell function during skeletal muscle regeneration	50
Javier	Stelling Ferez	The Francis Crick Institute	United Kingdom	Single molecule imaging and tracking to unravel TGF- β receptor dynamics	51
Benjamin	Tajer	Individual	USA	THE BMP6 PRODOMAIN IN THE REGULATION OF SYSTEMIC IRON LEVELS	49
Etsu	Tashiro	Showa Pharmaceutical University	Japan	CD73 as a Downstream Target of TGF- β Signaling in Tumor Immune Evasion	52
Camilla	Teng	University of California, San Francisco	USA	TGF β R1 drives upper lip morphogenesis through modulating early olfactory development	53
Sho	Tsukamoto	Saitama Medical University	Japan	ALK2 prevents GDF5 signaling by sequestering BMPRII from ALK3	60

Sebastiaan	van Kampen	Leiden University Medical Center	Netherlands	A genetic precision approach to model gene dosage effects in hereditary hemorrhagic telangiectasia	54
Xiao-Jing	Wang	University of California Davis, School of Medicine	USA	Rationalized design of targeting TGFbeta TME in head and neck cancer immunotherapy trial without an FDA approved TGFbeta inhibitor	56
Lukasz	Wieteska	The Francis Crick Institute	United Kingdom	Engineering a TGF- β antagonist for gene delivery and cell-targeted inhibition	58
Xue Li	Wong	Institute of Metabolic Science, Metabolic Research Laboratories, University of Cambridge	United Kingdom	A putative endocrine role for activin-a in the regulation of systemic protein homeostasis	57
Li	Yang	National Cancer Insitute	USA	Mechanisms of tumor dormancy in host anti-tumor immunity and in immune therapeutic relapse	22
Ying	Zhang	National Cancer Institute, NIH	USA	Smurf-mediated ubiquitination of CDK9 restricts Smad2-driven transcriptional elongation during mesendoderm differentiation	59
